1. About SOFTEK

SOFTEK INTERNATIONAL, INC. is a New Jersey-based federal technology services company delivering enterprise IT, cybersecurity, systems engineering, software modernization, and operational support to U.S. Government agencies. SOFTEK brings experience supporting complex federal missions and distributed operating environments.

Corporate qualifications include CMMI Maturity Level 3, ISO 9001, ISO/IEC 20000-1, ISO/IEC 27001:2022, GSA HACS SIN, and a Top Secret facility clearance. Applicability of each credential to a particular order is determined by its requirements.

Core Capabilities

- Enterprise IT operations and managed services
- Cybersecurity engineering, RMF, continuous monitoring, and Zero Trust
- Cloud architecture, migration, and operations
- Software engineering, modernization, DevSecOps, and automation
- Data engineering, analytics, AI/ML, and integration
- Network engineering, secure collaboration, and communications
- IT service management, help desk, and end-user support
- Program management, quality assurance, and training

2. About NASA SEWP VI

NASA SEWP VI is a Government-wide acquisition contract providing federal ordering activities access to information technology, communications, audiovisual, and related services and solutions. The services categories include Category B (enterprise-wide) and Category C (mission-based). SOFTEK should respond only within the category and scope stated in its executed award.

Scope Overview

Category B — Enterprise-wide	Category C — Mission-based
Agency-scale network, IT managed services, enterprise security, cloud, service integration, and data/application services	Program- and mission-level cybersecurity, cloud, software development, data analytics, IT operations, network/database and help-desk services

Product-only requirements are not within the service-only scope of Categories B and C. Applicable scope is controlled by the awarded contract and RFQ.

3. How to Obtain a Quote

Ordering activities can use the NASA SEWP Quote Request Tool to conduct market research and issue requests for quotations. SOFTEK will review each request for contract scope, category eligibility, and delivery capability.

Information to Include in a Request

- Agency and contracting office contact
- Performance work statement, statement of work, or requirements description
- Period and place of performance; anticipated contract type
- Security, accessibility, and agency-specific requirements
- Proposal instructions, evaluation factors, and response deadline
- Labor categories, pricing template, and any special terms

Contact	Details
Quote coordination	NASASEWPVI@softekintl.com
General customer assistance	NASASEWPVI@softekintl.com
SEWP portal	www.sewp.nasa.gov/sewpvi/

4. Ordering Process

Step	Activity
1. Define requirement	Develop the requirement and determine the appropriate SEWP category and acquisition approach.
2. Request competition	Use the SEWP Quote Request Tool and applicable fair-opportunity procedures.
3. Evaluate responses	Apply the solicitation's stated technical, past-performance and price factors.
4. Issue order	Issue and submit the order through the applicable SEWP PMO process.
5. Mobilize	SOFTEK validates acceptance, coordinates kickoff and transitions into performance.
6. Manage performance	Execute, report, invoice, resolve issues and support contract closeout.

5. Fair Opportunity

Ordering activities must provide fair opportunity in accordance with applicable FAR 16.505(b) and the SEWP VI contract. SOFTEK will respond through authorized channels and may decline a request if it cannot supply a complete, compliant in-scope solution.

6. Program and Post-Award Support

- Order validation, kickoff and transition planning
- Schedule, staffing, deliverable and performance management
- Contract and subcontract administration
- Quality, risk, issue and change control
- Invoicing, customer communication and closeout support

Warranty and Post-Delivery Support

Warranty, maintenance, service restoration, software support and other post-delivery obligations are governed by the terms of the individual order and applicable SEWP VI contract requirements.

7. Key Ordering Terms

Topic	Guide Summary
Ordering period	November 1, 2026 – October 31, 2036, subject to the awarded contract and any extensions
Contract ceiling	$20 billion per contract
Order types	Firm-fixed-price, time-and-materials, labor-hour and other types authorized by the contract
Minimum order	$25, subject to final contract verification
Administrative fee	SEWP program fee handled in accordance with contract pricing and ordering instructions
Fair opportunity	FAR 16.505(b) and NASA SEWP ordering procedures
Accessibility	Applicable ICT must meet Revised Section 508 Standards
Security	Order-specific cybersecurity, safeguarding and supply-chain requirements apply
Invoices	Submit according to the task order and relevant SEWP PMO requirements

Important: The executed SOFTEK contract, task-order solicitation, and resulting order govern in case of inconsistency.
